

**REMARKS**

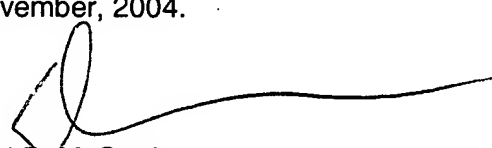

Applicant has cancelled all pending claims and submitted new claims to avoid confusion due to the claim misnumbering issue. The new claims are believed to be free of any section 112 issue.

A terminal disclaimer is enclosed to overcome the double patenting issue. Applicant notes that although the Examiner required a terminal disclaimer over serial no. 10/189,233, Applicant is not the owner of that application, and the subject matter of that application is unrelated to Applicant's invention. Applicant believes that the Examiner intended serial no. 10/189,223 and has made the terminal disclaimer over that case.

The substantive limitations of claim 2, previously determined to be allowable, are now present in all independent claim, including the concept of a semiconductor chip in a well and the angular orientation of the light emitted.

Applicant believes the case is now in condition for allowance. If any additional fees are due those fees should be charged to deposit account no. 50-0581.

Respectfully submitted this 12th day of November, 2004.
